

**MAHONY, STEPHEN (2011) Two new species of *Megophrys* Kuhl & van Hasselt (Amphibia: Megophryidae), from western Thailand and southern Cambodia. *Zootaxa*, 2734, 23–39.**

The holotype specimen number provided was incorrect for *Megophrys damrei*. The correction here of the specimen number does not affect the nomenclatural status of the species, of which the holotype is extant and clearly identifiable from its morphological description, collection locality and figures. This correction also does not affect the type status of the described specimen as the holotype for *Megophrys damrei*.

The specimen number NHM [BMNH] 1972.1524 based on the NHM museum register and specimen tag applies to the paratype of *Ophryophryne gerti* Ohler, 2003, referred to as BMNH 1972.15.2.4 in the original description (Ohler 2003), and thus is not intended to refer to *Megophrys damrei*.

On page 25.

**Holotype.** Adult female (NHM 1972.1524), "Bockor [=Bokor] Plateau, 1000m, Elephant Mts., [Kampot] Cambodia", collector Malcolm A. Smith, March to April, 1914.

Corrected to:

**Holotype.** Adult female (NHM 1972.1522), "Bockor [=Bokor] Plateau, 1000m, Elephant Mts., [Kampot] Cambodia", collector Malcolm A. Smith, March to April, 1914.
